GP1FAV30RK0F

Fiber Optic Receiver
Square connector
With mounting hole
Protection cap type

**Description**

GP1FAV30RK0F employs an OPIC device that integrates a photodiode and signal processing circuit onto a single chip, and the output is at TTL levels.

**Features**

1. Fiber optic receiver
   (Transmitter: GP1FAV30TK0F)
2. Square connector (JEITA RC-5720B)
3. With mounting hole
4. Protection cap type
5. Supply voltage: 3 V
6. Transfer rate: 15.5 Mb/s

**Agency approvals/Compliance**

1. Compliant with JEITA RC-5720B and CP1201
2. Compliant with RoHS directive (2002/95/EC)

**Applications**

AV equipment
(DVD, CD, MD players etc.)

Notice  The content of data sheet is subject to change without prior notice.
In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

©SHARP Corporation
**Outline Dimensions**

(Unit: mm)

Example of mounting drawing from solder side.
Unspecified tolerance ± 0.1

![Diagram of connector joint area](image)

**Internal Equivalent Circuit**

*1 OPIC is a registered trade mark of Sharp (Material: Silicon)

**Pin Arrangement**

</table>

1) The connector joint area complies with the square connector JEITA RC-5720B.
3) Unspecified tolerance are ± 0.3
4) Since there are other products which has a different fixing pin shape,
   please make sure to confirm reference mounting drawing for this device.

Notes
(1) This operating transfer rate shall be a specification when NRZ, duty 50 % of continuous “0101···” signal is transferred.
(2) The output (H/L Level) of this product are not fixed constantly when it receivers the modulating light (including DC light, no input light) less than 0.1 Mb/s.

- Fiber optic cable
- GP1FAV30RK0F Device under test

Input conditions:
- Standard transmitter input signal: 15.5 Mb/s NRZ, Duty 50 % or 7.75 Mb/s bi-phase mark PRBS signal

Sheet No.: E2-A01101EN
Fig. 2 Output Voltage and Pulse Response

![Fig. 2 Output Voltage and Pulse Response](image)

Fig. 3 Input and Output Signal

![Fig. 3 Input and Output Signal](image)

Notes
(1) VCC = 3.0V (State of operating)
(2) The fiber coupling light output set at –14.5 dBm or –24.0 dBm.
(3) The probe for the oscilloscope must be more than 1 MΩ and less than 10 pF.
(4) Rsi, Rso: Standard load resistor (Rsi: 3.3 kΩ, Rso: 2.2 kΩ)
(5) The output (H/L level) of this device are not fixed constantly when it receivers the modulating light (including DC light, no input light) less than 0.1 Mb/s.
Fig. 4 Pulse Response and Jitter

- **Standard transmitter** connected to **GP1FAV30RK0F Device under test** via a **Fiber optic cable**.
- **Input signal**: 7.75 Mb/s bi-phase PRBS signal.
- **Tektronix 7834 or 7934 type Oscilloscope** with **Trigger** on **CH1**, **Mode** as **Storage mode**, and **Sweep** as **AUTO/NORM**.

**Notes**
1. The fiber coupling light output set at -14.5 dBm or -24.0 dBm.
2. **Rsi**, **Rso**: Standard load resistor (**Rsi**: 3.3 kΩ, **Rso**: 2.2 kΩ).
3. Set the oscilloscope to the storage mode and write time to 3 seconds. Do not allow the brightness to be increased too much. The waveform would be distorted.
4. **VCC** = 3.0 V (State of operating)
5. The probe for the oscilloscope must be more than 1 MΩ and less than 10 pF.

Design and Production Notes

(1) Stabilization of power supply line
   Please put a by-pass capacitor (0.1 μF) close to the device at least within 7 mm of the terminal.
   Please also put a 4.7 μF capacitor across the power supply line nearby.

(2) Soldering condition
   Solder at the condition within the absolute maximum ratings in this sheet. In case of using flow soldering, please make
   sure of the conditions of process at the flow equipment. Also, do not use reflow soldering. In case of soldering by hand,
   do not contact top of soldering iron to lead terminal directly. (Solder at a position more than 1.6 mm away from the base
   of the lead terminal.)

(3) About getting dirt and dust in the connector coupling portion
   In case dirt or dust comes into the connector coupling portion, please use a blower to take it off.
   Any rigid rod-like object must not be inserted since into the coupling portion.
   The internal device might be damaged, resulting deteriorated characteristics.

(4) Cleaning
   Do not immerse for cleaning. The solvent would get into the connector coupling portion resulting deteriorated
   characteristics. Should it be necessary to remove the flux, please use one of the following solvents only to be applied with
   a brush.
   Solvent : Isopropyl alcohol, Methyl alcohol

(5) Ground during assembling
   The human body and the soldering iron must be grounded against the static breakdown of the device during assembling.
   Please avoid touching the device terminals as much as possible before assembling.

(6) Assembly of the device
   Please fix this device with a screw. In case that this device is not fixed with a screw, stress by detaching connector of
   internal elements and leads can adversely affect the device’s reliability. Excessive torque can deform the package and
   damage the optics. It can also adversely affect the device’s reliability because the device is used under continuous stress.
   Please confirm the limit of fixing torque to the installation before fixing actually.

   Recommended values
   Screw : M3.0 × 8 mm tapping screw
   Fixing torque : 0.7 to 0.8 N·m
   Force applied by driver etc. : 39 N or less

   Note : Please contact and consult with a Sharp sales representative for any questions about above.

(7) Input signal
   This product is designed intentionally based upon the signal transmission which is defined by the digital audio interface
   standard ; CP1201. When a signal out of JEITA standard CP-1201 is inputted to this device, there might be a case that this
   device can not receive a signal correctly from transmitting unit.

(8) Fixing pin
   Since there are other products which has a different fixing pin shape, please make sure to confirm reference mounting
   drawing for this device.

(9) Damage to connector coupling portion
   Please do not stress the connector coupling portion excessively since there might be a case that the shutter can’t operate
   normally.

(10) About getting the flux into connector coupling portion
   Please avoid getting a flux into connector coupling portion of this device, because there might be a case that the characteristics
   deteriorate the shutter can’t operate normally.
● Presence of ODC etc.
This product shall not contain the following materials.
And they are not used in the production process for this product.
Regulation substances: CFCs, Halon, Carbon tetrachloride, 1,1,1-Trichloroethane (Methylchloroform)

Specific brominated flame retardants such as the PBB and PBDE are not used in this product at all.

This product shall not contain the following materials banned in the RoHS Directive (2002/95/EC).
- Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyls (PBB),
  Polybrominated diphenyl ethers (PBDE).

■ Packing Specifications

PACKING MATERIAL
Tray: Polystyrene

PACKING METHOD
Each tray holds 200 pieces.
Important Notices

- The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property rights. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP's devices.

- Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structure, and other contents described herein at any time without notice in order to improve design or reliability. Manufacturing locations are also subject to change without notice.

- Observe the following points when using any devices in this publication. SHARP takes no responsibility for damage caused by improper use of the devices which does not meet the conditions and absolute maximum ratings to be used specified in the relevant specification sheet nor meet the following conditions:
  (i) The devices in this publication are designed for use in general electronic equipment designs such as:
    --- Personal computers
    --- Office automation equipment
    --- Telecommunication equipment [terminal]
    --- Test and measurement equipment
    --- Industrial control
    --- Audio visual equipment
    --- Consumer electronics
  (ii) Measures such as fail-safe function and redundant design should be taken to ensure reliability and safety when SHARP devices are used for or in connection with equipment that requires higher reliability such as:
    --- Transportation control and safety equipment (i.e., aircraft, trains, automobiles, etc.)
    --- Traffic signals
    --- Gas leakage sensor breakers
    --- Alarm equipment
    --- Various safety devices, etc.
  (iii) SHARP devices shall not be used for or in connection with equipment that requires an extremely high level of reliability and safety such as:
    --- Space applications
    --- Telecommunication equipment [trunk lines]
    --- Nuclear power control equipment
    --- Medical and other life support equipment (e.g., scuba).

- If the SHARP devices listed in this publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Law of Japan, it is necessary to obtain approval to export such SHARP devices.

- This publication is the proprietary product of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.

- Contact and consult with a SHARP representative if there are any questions about the contents of this publication.
