

# Channel ACTION ALERT!

**OMRON**  
INDUSTRIAL AUTOMATION

**NO: LS-051**                      **PRODUCT: D4N Safety Limit Switches**  
**DATE: December 2011**            **TYPE: Discontinuation Notice**

## Partial Discontinuation of D4N Compact Safety Limit Switches March 31, 2012

*Models include ½"-14NPT conduit sizes, 2-conduit and non-safety models*

Part of the D4N Compact Safety Limit Switch series will be discontinued on March 31, 2012. However; Omron Canada will no longer be stocking these units and, once current inventory is depleted, all new orders will be migrated to replacement models.

### Discontinued Models and Recommended Replacements

- All 1- and 2-conduit ½"-14NPT versions will be migrated to single conduit versions with G1/2 conduit entrance.
- All Switch item numbers ending with the following suffixes will no longer be available and the switch must be re-specified:
  - 80: Cat whisker
  - 87: Plastic rod
  - RE: Fork lever lock (right operation)
  - LE: Fork lever lock (left operation)

These products were not rated for safety.

Conduit Entrance: ½"-14NPT versus G1/2

- same number of threads per inch: 14
- same pitch of thread: 0.07143"
- G1/2 conduit entrance does not taper but will mate with most conduit fittings
