## Notes:

4. On resistance is determined by the voltage drop between $A$ and $B$ pins at the indicated current through the switch.
5. $\Delta \mathrm{R}_{\mathrm{ON}}=\mathrm{R}_{\mathrm{ONmax}}-\mathrm{R}_{\mathrm{ONmin}}$ measured at identical $\mathrm{V}_{\mathrm{CC}}$, temperature, and voltage.
6. Flatness is defined as the difference between the maximum and minimum value of $R_{O N}$ over the specified range of conditions.
