INTRODUCTIONS
1. Designed to meet globally accepted IEC publication 320 Class 1, that allows users to comply with industry standard in power entry requirement.
2. Connector for cold condition, with pin temperature 65°C max.
4. Screw-on mount from front or rear (with screw type-M3).
5. Power module incorporates an IEC connector, double-fuse holder, voltage selector, double-pole power switch, all-in-one easy-to-install unit.
6. Double-fuse holder designed for two fuses and two spare fuses (all 5x20mm fuses).
7. Adapts to 100-120V or 200-240V input voltage simply by reversing the voltage selector card.
8. Compact design and high volume production provide maximum flexibility and significant savings in space and cost over assembly of individual components.
9. All part numbers are UL recognized, CSA & VDE approved.
10. Power modules with built-in filters are also available. See Delta EMI Filter catalog for CK and CR series.
