The FLIR Lepton® Thermal Camera Breakout Board is an easy-to-interface evaluation board to quickly connect all versions of the FLIR Lepton camera module to common platforms like Raspberry Pi® or custom hardware such as mobile development kits. It provides on-board power supplies, generated from 3 – 5.5V, and a master clock. Local power supplies, the master clock and the power-up sequence components can all be by-passed using a jumper.

Lepton sold separately or in a kit through major electronic component distributors worldwide.

**EASY-TO-INTERFACE EVALUATION BOARD**

**FLIR Lepton® Camera Breakout Board v2.0**

The FLIR Lepton® Thermal Camera Breakout Board is an easy-to-interface evaluation board to quickly connect all versions of the FLIR Lepton camera module to common platforms like Raspberry Pi® or custom hardware such as mobile development kits. It provides on-board power supplies, generated from 3 – 5.5V, and a master clock. Local power supplies, the master clock and the power-up sequence components can all be by-passed using a jumper.

Lepton sold separately or in a kit through major electronic component distributors worldwide.

PN: 250-0577-00

**SIZE, WEIGHT AND POWER (SWAP)**

**EASE OF INTEGRATION**

**APPLICATIONS**

**EASE OF INTEGRATION**

- Faster time to market
  - Access to SPI and I2C camera module interfaces
  - Provides 25-MHz reference clock (can be by-passed)
  - Power Efficient 1.2 V core voltage (can be by-passed)
  - Dual Low Noise LDO for 2.8 V voltage (can be by-passed)
  - 32-pin Molex camera socket for Lepton® Module

**APPLICATIONS**

- Designed for applications where SWaP, cost, and quality are critical
  - Rugged and Mobile Devices
  - Smart Buildings and Smart Cities
  - Motion Sensor
  - Gesture Recognition

*Raspberry Pi is a trademark of the Raspberry Pi Foundation. This product is not designed or qualified for production use.*
**SPECIFICATIONS**

**Mechanical**

Thickness including Molex socket and jumper pins but excluding the Lepton: 15mm.

**Electrical**

Schematic: 250-0577-24_R120
Assembly drawing: 250-0577-25_R120
The Lepton breakout board comes with jumpers on J5 – J9 installed. With all jumpers installed Lepton can be operated from J2 with 3-5V on J2 pin2. Jumpers J5 – J9 can be removed to provide control individual voltage, master clock or power up sequence externally.

**Pin-Out**
