Logic PD’s product-ready software and hardware platforms fast forward your product development while reducing risk and controlling costs. The Zoom OMAP-L138 EVM Development Kit is a high-performance application development kit for evaluating the functionality of Texas Instruments’ energy-efficient OMAP-L138 applications processor, TMS320C6748 Digital Signal Processor (DSP), and Logic PD’s System on Module (SOM).

Application development is performed right on the product-ready OMAP-L138 SOM-M1 and software Board Support Packages (BSPs) included in the kit, which enables you to seamlessly transfer your application code and hardware into production. The included SOMs provide easy evaluation of the OMAP-L138 processor and TMS320C6748 DSP.

The OMAP-L138 SOM-M1 is ideal for applications that require high-speed data transfer and high-capacity storage, such as test and measurement, public safety radios, audio applications, and intelligent occupancy sensors. The OMAP-L138 and TMS320C6748 offer a universal parallel port (uPP) and are the first TI devices with an integrated Serial Advanced Technology Attachment (SATA) interface. For medical, industrial, audio, and communication products, the OMAP-L138 SOM-M1 allows for powerful versatility, long-life, and greener products.

The Zoom OMAP-L138 EVM Development Kit includes two SOMs (OMAP-L138 SOM-M1 and TMS320C6748 SOM-M1), application baseboard, user interface (UI) board, accessories, and software required to immediately begin development work.
## Zoom™ OMAP-L138 EVM Development Kit Ordering Information

<td>$849</td>
</tr>
</tbody>
</table>

**NOTES:**
1. The EVM Development Kit is available through Texas Instruments distributors. The OMAP-L138 EVM currently uses pre-release (X) processor silicon.
2. This configuration is the SOMOMAPL138-10-1602AHCR with added power measurement circuitry.

### Product Features

- **Texas Instruments OMAP-L138 SOM-M1 & TMS320C6748 SOM-M1 Included**
  - Two SOMs included to evaluate the OMAP-L138 processor and TMS320C6748 DSP
  - Analog video in/out connectors (TVP5147/ADV7343)
  - Analog-to-digital converter (ADS901)
  - Digital-to-analog converter (DAC900)
  - Camera interface
  - 48-character LCD panel
  - UI board RJ45 Ethernet connector
  - 8 MB NOR flash
  - 512 MB NAND flash

- **Network Support**
  - Baseboard RJ45 Ethernet connector
  - SATA
  - Serial ATA connector
  - Board Support Library (BSL) sample programs

- **USB**
  - One USB 2.0 high-speed
  - On-the-Go interface
  - One USB 1.1 full-speed host

- **Serial Ports**
  - 115.2kbps RS-232 debug serial port
  - Debug
  - Connectors for JTAG interface
  - XDS100 emulation circuit

- **User Interface (UI) Board**
  - S-Video in/out connectors
  - Analog video in/out connectors (TVP5147/ADV7343)
  - Analog-to-digital converter (ADS901)
  - Digital-to-analog converter (DAC900)
  - Camera interface
  - 48-character LCD panel
  - UI board RJ45 Ethernet connector
  - 8 MB NOR flash
  - 512 MB NAND flash

- **Software**
  - U-Boot (bootloader/monitor)
  - Open source Linux BSPs
  - Code Composer Studio (CCS) v3.3
  - DSP/BIOS
  - Board Support Library (BSL) sample programs

- **Cables**
  - Serial cable (null-modem)
  - Ethernet crossover cable
  - USB A to mini-B cable
  - 5 volt power supply (with Europe, Japan, UK, & US adapters)

- **RoHS Compliant**
