<td>500M ohm</td>
<td>1MHz to 1GHz:35dB min. (20 to 25 degrees C line impedance=50 ohm)</td>
</tr>
</tbody>
</table>

Operating Temperature Range: -40°C to 125°C
In operating temperatures exceeding +85°C, derating of current is necessary.

**Notice (Rating)**

In operating temperatures exceeding +85°C, derating of current is necessary for BNX022 series. Please apply the derating curve shown in chart according to the operating temperature.

**Notice (Rating)**

In operating temperatures exceeding +85°C, derating of current is necessary for BNX023 series. Please apply the derating curve shown in chart according to the operating temperature.

**Caution (Rating)**

Do not use products beyond the rated current and rated voltage as this may create excessive heat and deteriorate the insulation resistance.

This data sheet is applied for Block Type EMIFIL® used for General Electronics equipment for your design.

**Note:**

1. This datasheet is downloaded from the website of Murata Manufacturing co., ltd. Therefore, it's specifications are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering.
2. This datasheet has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.
