On-Board Type (DC) EMI Suppression Filters (EMIFIL®)

Block Type EMIFIL® BNX Series

BNX Series

The block type "EMIFIL" BNX series incorporates through-type capacitor, monolithic chip capacitors and bead. The BNX is high performance for use in DC power circuits.

Features

1. The filter enables obtaining high insertion loss in wide frequency ranges from 0.5MHz to 1GHz.
2. The only one filter block enable noise suppression of both the positive and negative lines.
3. There are no connection routes in the current circuits, thus ensuring highly reliable performance.

Applications

Noise suppression for DC power line of large screen display
1. PDP
2. LCD-TV

BNX Series Low Profile for Large Current

The block type "EMIFIL" BNX010 series is high performance and BNX series provide excellent noise suppression on DC power line.

Features
1. High insertion loss characteristic over a wide frequency band range.
   - 1MHz to 1GHz: 40dB min. (BNX012)
   - 100kHz to 1GHz: 40dB min. (BNX016)
2. Large rated current (15A) and Low Rd (0.8m ohm-typ.)
3. Low profile (height: 8.0mm except lead terminal)

Applications
Noise suppression for DC power line of large screen display
1. PDP
2. LCD-TV

Notice (Rating)

In operating temperatures exceeding +85°C, derating of current is necessary for BNX010 series. Please apply the derating curve shown in chart according to the operating temperature.
