## BEZELS FOR LED AND LCD ASSEMBLY

PRD Products' high quality, low cost bezels and filter assemblies are the ideal solution for both LED and LCD displays. These high impact bezels will enhance the appearance of your front panel displays while providing superior display visibility and durability.

PRD Products has designed and manufactured both snap-fit bezels and lo-profile bezels to fit most requirements. With comprehensive sizes and lens/filter colors available for immediate delivery, your production needs can be met.

Dedicated to customer satisfaction, PRD Products prides itself on its commitment to quality and service. We'll work hard to meet your specific needs, if you don't see what you need, just call and our customer service representatives will assist you in every way possible.

Snap-fit Installation: is fast and efficient. by inserting the filter into the use of two adhesive strips. Simply the slots on the bezel, push the clip bars onto the pins and snap in - this holds the lens.

The entire assembly can then be pushed into the panel cutout. This quick procedure provides a secure fit and is achieved without the use of any tools or adhesives.

Recommended panel thickness is from .032 to .125 inches.

Lo-profile Installation: is made possible by remove the adhesive strip backing and push bezel into place. This type of bezel works well for applications where there is a high density of components and space is at a premium.

NEW! Lo-Profile Polycarbonite NonRemovable Lens (requires adhesive strips)

Snap-Fit Bezels and Plastic Clip Bars

Bezel material is polystyrene plastic. Recommended panel thickness for mounting snap-fit bezel is .032" to .125"
