Remington Industries is a proud supplier of 6061 Aluminum T6511 Mill Stock Flat Bars, Round Rods, and Angles. Aluminum 6061 is a lightweight, general-purpose aluminum alloy that can easily be machined or welded. It has a high resistance to corrosion and an excellent weight-to-strength ratio. Its T6511 temper also means that it has been heat treated for additional strength (Yield Strength: $35,000 \mathrm{psi}$ ). Additionally, this 6061 aluminum meets ASTM B221 specifications.
We offer aluminum bars, rods, and angles in many different sizes; take a look at our selection using the charts below. If you can't find a piece of raw material that meets your specifications, feel free to contact Remington Industries to see how we can help you with our Custom Raw Materials Services.

- Material: 6061 General Purpose Aluminum, Extruded
- Temper: T6511
- Finish: Unpolished (Mill)
- Yield Strength: 35,000 psi
- Easily welded or machined
