

DR67 SERIES | 60/75 AMPS

DIN RAIL MOUNT SOLID STATE RELAYS

Introduction

The DR67 is a compact 3-phase solid state relay in a DIN rail 67.5mm wide package with output ratings up to 75 Amps per channel @ 40°C. It has an integrated fan which allows the product to achieve very high ratings while maintaining a compact design. Its built-in overvoltage protection and the overtemperature protection make it suitable for demanding heating, motion and lighting applications.

It's easy to install and its large cage clamp terminals allow connecting wires up to 2 AWG size on the output terminals without the use of any additional accessories, therefore reducing installation cost and time.

UL listed and VDE certified, the DR67 is a powerful and versatile solid state relay with superior performance when compared to previous generations and competitor products.

Features

- 3-Phase AC Output DIN Rail Mount SSRs
- Output ratings up to 75 Amps at 600 VAC
- 2 & 3 controlled Legs option
- Built-in overvoltage protection
- Clamp Cage terminal type accepts up to 2 AWG wire size
- Fan controlled through thermistor and microprocessor to optimize fan operation
- IP20 touch-safe housing
- AC or DC control
- cULus listed and VDE approved

Applications

- Plastic injection molding equipment
- Packaging equipment
- Industrial ovens
- Lighting control
- Professional cooking equipment
- Pump control
- Conveyor drives
- HVAC&R

INSTALLATION INSTRUCTIONS

Mounting on DIN Rail

- Locate rail and align with non moveable end of DR67 DIN clip.
- Using reasonable force, push DR67 in the direction of the arrow (as shown in fig.1).
- For removal pull release tag by moving blade of screwdriver in direction of arrow and pull it away from DIN rail.
- For models with integrated fan removal tool must be inserted from the side (as shown in fig. 2)

Wiring Instructions

- Recommended wire sizes as shown in TABLE 1
- Maximum terminal screw torque input terminal 5 lb-in (0.5 Nm) (screw terminal only)
- Maximum terminal screw torque load terminal 18-20 lb-in (2.0-2.2 Nm)
- Strip length for input terminals: Per manufacturer specifications
- Strip length for load terminals: 10mm min.
- Use only copper conductors rated for 75°C
- If multiple units are installed be sure to follow derating curves.

WARNING!!

- Removing product from 35mm Rail incorrectly by not using the appropriate tool, would damage the latching system.

Protective Earth Connection

Protective earth (PE) screw type recommended is 10-32 UNC standard not provided with SSR.

Through the use of a DIN rail ground (protective conductor) terminal block, the DIN rail itself can be used as the grounding bus bar. In this case, the zinc plated steel material used for the DIN rail clip of DR67 models, permits a secure path to ground and avoid the need of a further PE connection.

GENERAL NOTES

- (1) All parameters at 25°C unless otherwise specified per Channel.
- (2) Output will self trigger between 900-1200 Vpk, not suitable for capacitive loads.
- (3) Turn-on time for Instantaneous turn-on versions is 0.3 msec.
- (4) When protected with the appropriate class and rated fuse. For detailed info please contact Sensata Technical Support.
- (5) No freezing or condensation allowed.
- (6) For single surge pulse Tc=25°C; Tj=125°C. For AC Output SSRs, AC RMS value of surge current equals the peak value divided by 2 (1.414).
- (7) Test conditions: Din Rail stoppers side by side between a single SSR.

WARNINGS

RISK OF MATERIAL DAMAGE AND HOT ENCLOSURE

- The product's side panels may be hot, allow the product to cool before touching
- Follow proper mounting instructions including torque values
- Do not allow liquids or foreign objects to enter this product

Failure to follow these instructions can result in serious injury, or equipment damage.

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Disconnect all power before installing or working with this equipment
- Verify all connections and replace all covers before turning on power

Failure to follow these instructions will result in death or serious injury.
