B&B Electronics announces the last-time-buy and end-of-life for the product listed above. Customers may place "last time buy" orders until Dec 1, 2015

End of Life Milestones:

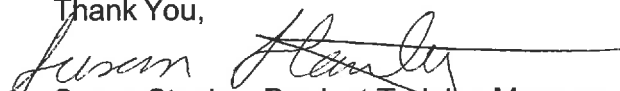

Orders will be accepted until Dec 1, 2015 and will be shipped as long as inventory is available. All shipments will be completed no later than Dec 1, 2015

Product Migration Path:

The replacement product line is the IE-iMcV-T1/E1/J1-LineTerm Module with Configuration Control. In the same form factor as the Repeater series, it offers more alarm indicators and includes a fiber SFP-based model as well as extended temperature. It is also a Layer 1 device and requires a pair, to be configured as Host/Remote. The 850-18XXX series has been available for 4 years and is a suitable replacement. The recommended model cannot be interconnected to the former models.
