Dear Customer,

**Re: Product Change Notification for Harwin product.**

As part of our continuous improvement process, please be advised that the following ranges of Datamate L-Tek SMT are now being manufactured with a different plastic material:

- M80-665
- M80-666
- M80-667
- M80-826
- M80-827
- M80-828
- M80-835
- M80-836
- M80-837
- M80-926
- M80-927
- M80-928

Please see the attached spreadsheet for a complete list of affected items.

The plastic material used on these connectors was a grade of 30% Glass-filled Polyamide 46. We are now using a grade of 30% Glass-filled PPS. This change will not affect the dimensions, electrical or mechanical performance, or appearance of the connectors. The same PPS material is already used on the J-Tek versions of Datamate.

Stocks of the most popular products are now shipping in PPS, and other lines will convert during the next few months. If you need to confirm which material you have been shipped, please advise the part number and batch number to our Customer Services Team on [sales@harwin.co.uk](mailto:sales@harwin.co.uk), and they will confirm this information.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Management Team  
[technical@harwin.com](mailto:technical@harwin.com)
