

PCN Notice

Manufacturing of the connector part numbers IL-AG5-5S-S3C1 and IL-AG5-5SK-S3C1-LB will have additional mold tool to be used for additional capacity and back-up if needed.

Existing tooling will continue to manufacture these connectors in parallel, so there will be no interruption in the supply of parts.

Trial runs at JAE Oregon will be conducted in late November of 2018. Mass production and shipment of parts should begin shortly after.

For existing customers who require any special documentation such as PPAP, please contact your JAE account representative by the end of October 2018.

If you have any questions regarding this matter, please contact your JAE account manager.

Thank you for your cooperation.
