

Change Notice

JW Series

Change of Gasket Material for JWMW Rockers

Type of Change:

- Engineering Part Number
- Product Appearance

JWMW Rocker

JWMW Rockers will have a change to the material used in the gasket. This change will effect only the MW type that has the black switch body. The gasket material is converting from nitrile butadiene rubber to chloroprene rubber, and will effect both standard and custom products.

Gasket Material

Before Change	After Change
Nitrile Butadiene Rubber	Chloroprene Rubber

Note: Under certain conditions, environmental resistance may change. Contact NKK Switches if switch is used in oily environment, or if further details are needed.

Effective Date

Changes to JWMW Rockers gasket material will be effective December 2014.
