Here’s your personalized quality information concerning products Digi-Key purchased from NXP. For detailed information we invite you to view this notification online.

To increase the number of empty pockets on the leader (inner hub) of the DPAK reel:

As part of an improvement action, NXP intend to increase the number of empty pockets from 55 to 90 on the inner hub of the DPAK reel in order to mitigate the possibility of mechanical damage occurring during transportation or storage. This will also subsequently reduce the number of empty pockets on the outer reel (trailer) from 55 to 20. Customers may need to change their pick and place set-up accordingly. This change applies to all SOT428B Automotive device types.

Why do we issue this Information Notification
Improvement action for lifted pin previously seen near the inner hub of the reel.

Identification of Affected Products
Product identification does not change.

Update Information
To change the number of empty pockets for the leader (inner hub) from 55 to 90 empty pockets. There will be no
change to the number of empty pockets on the outer reel (trailer), this will remain at 55.
