To increase the number of empty pockets on the leader (inner hub) of the DPAK reel

Information Notification

As part of an improvement action, NXP intend to increase the number of empty pockets from 55 to 90 on the inner hub of the DPAK reel in order to mitigate the possibility of mechanical damage occurring during transportation or storage. This will also subsequently reduce the number of empty pockets on the outer reel (trailer) from 55 to 20. Customers may need to change their pick and place set-up accordingly. This change applies to all SOT428B Automotive device types.

Why do we issue this Information Notification

Improvement action for lifted pin previously seen near the inner hub of the reel.

Identification of Affected Products

Product identification does not change

Impact

no impact to the product's functionality anticipated.
No impact anticipated.

Data Sheet Revision

No impact to existing datasheet

Disposition of Old Products

Existing inventory will be shipped until depleted
Deplete all existing stocks

Remarks

This product change notification is for your company internal use and for your use as Distributor towards your direct customers. You are responsible for the correct circulation of this information to your direct customers.
NXP does not accept liability for any failure to notify your direct customers of this change within the appropriate timeframe, or for any other incorrect further distribution of this information.
