## **PARTS CHANGE NOTIFICATION**

**PART NUMBER: AC30MNA-R**

This document is to advise that the AC30MNA-R power cord was recently re-certified to UL and CSA approval and during the process the rating for the power cord has changed from 10A to 7A. Additionally, to circumvent the tariffs levied by the U.S. government against parts made in China, the manufacturing location of the AC30MNA-R is moving from China to Thailand. This will be effective for all new builds going forward.

Attached for your review are the drawings for the current 10A AC30MNA-R power cord that is made in China and the new 7A AC30MNA-R 7A that will be made in Thailand.

Please do not hesitate to let me know if you should have any questions.

Sincerely,

Thomas Chin  
Sr. Marketing Manager  
Phihong USA Corp.
