

190502535 Si838x Data Sheet Revision 1.0 Released

PCN Issue Date: 5/2/2019

Effective Date: 8/8/2019

PCN Type: Datasheet

Description of Change

Silicon Labs is pleased to announce the 1.0 revision of the Si838x data sheet. The updated data sheet has improved readability, expanded feature descriptions, included additional design documentation, and is updated with the latest test data and certifications. Specifications are added, and specific corrections are made to the truth table, thermal derating curve, and isolation working voltages.

Reason for Change

Various improvements to readability, grammar, and formatting have been collected since the last revision. Additional test data has been gathered to improve electrical specifications. An error was found in the description of the output state when the device is unpowered, and an error was discovered in the calculation used for the thermal derating curve.

Impact on Form, Fit, Function, Quality, Reliability

There is no impact on form, fit, quality, or reliability.

The following updates are made which impact function:

- 1) Changed the truth table to show the output as "undetermined" when VDD is in UVLO
- 2) Updated the thermal derating curves and reduced safety current specification accordingly
- 3) Updated the isolation working voltage for multiple safety certifications
- 4) Added an electrical specification for input voltage logic levels

Last Date of Unchanged Product: 8/8/2019

Qualification Samples

Samples available upon request.

Customer Response

Lack of acknowledgment of the PCN within 30 days constitutes acceptance of the change, Ref. JEDEC-J-STD-046.

To request further data or inquire about this notification, please contact your Silicon Labs sales representative. A list of Silicon Labs sales representatives is available at <http://www.silabs.com>.

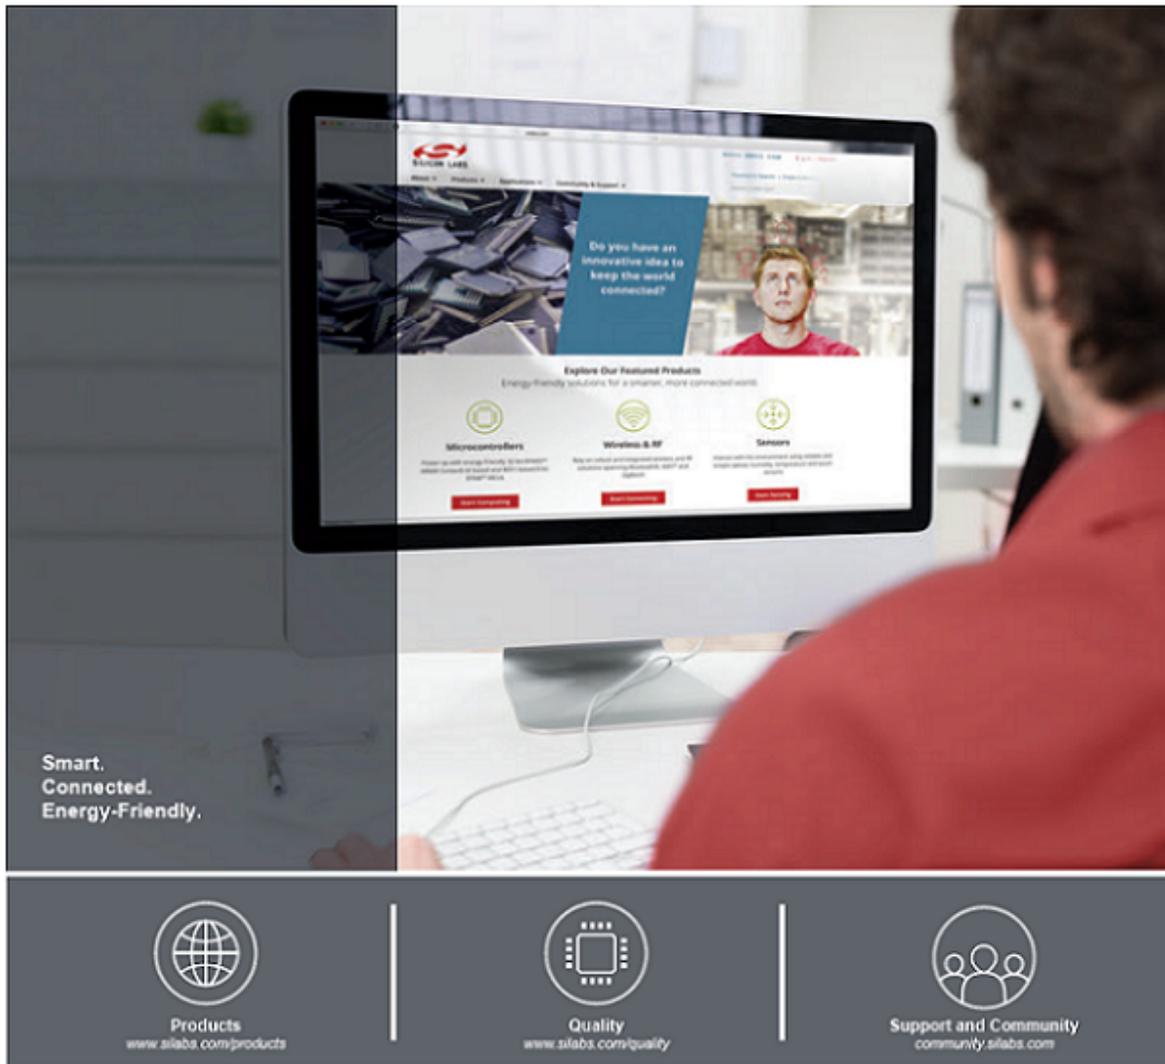

Customers may approve early PCN acceptance by emailing approval, along with PCN # to PCNEarlyAcceptance@silabs.com

Qualification Data

Not applicable.

Disclaimer

Silicon Labs intends to provide customers with the latest, accurate, and in-depth documentation of all peripherals and modules available for system and software implementers using or intending to use the Silicon Labs products. Characterization data, available modules and peripherals, memory sizes and memory addresses refer to each specific device, and "Typical" parameters provided can and do vary in different applications. Application examples described herein are for illustrative purposes only. Silicon Labs reserves the right to make changes without further notice and limitation to product information, specifications, and descriptions herein, and does not give warranties as to the accuracy or completeness of the included information. Silicon Labs shall have no liability for the consequences of use of the information supplied herein. This document does not imply or express copyright licenses granted hereunder to design or fabricate any integrated circuits. The products are not designed or authorized to be used within any Life Support System without the specific written consent of Silicon Labs. A "Life Support System" is any product or system intended to support or sustain life and/or health, which, if it fails, can be reasonably expected to result in significant personal injury or death. Silicon Labs products are not designed or authorized for military applications. Silicon Labs products shall under no circumstances be used in weapons of mass destruction including (but not limited to) nuclear, biological or chemical weapons, or missiles capable of delivering such weapons.
