

200331636 Wireless IoT Modules Tracecode and 2D Barcode Change for Zentri

Bulletin Issue Date: 3/31/2020

Effective Date: 3/31/2020

Description of Change

Silicon Labs is pleased to announce the standardization and implementation of the tracecode for batch level traceability and 2D barcode for unit level traceability for Zentri modules. The marking label is replaced with shield marking. The detailed tracecode description can be found at document "Wireless IoT Modules Master Errata for Zentri Shield Marking" available for download in www.silabs.com.

The new Tracecode standard for Batch level traceability:

YYWWTTTTTT

YYWW = Datecode - Year (digits) Week (digits)

TTTTTT = Manufacturing Code

The new Unit ID / 2D barcode standard for Unit level traceability:

YYWWMABCDE

YYWW = Datecode - Year (digits) Week (digits)

MMABCDE = Silicon Labs Unit Code

The new markings will become effective for any new Silicon Labs Wireless IoT module from April 2019. Customers may receive products with old and new standard (or mixed) until the Silicon Labs module inventory for old markings is consumed.

Reason for Change

Implement common tracecode standard across all the Wireless IoT modules and enable Unit level traceability for the future.
